

die 10854 4.5 x 3.75

Active Ingredients:	
Dried Blood	30.0%
Potassium Sorbate	0.5%
Inert Ingredients:	
Paprika/Garlic/Water	69.5%

SHAKE CONTAINER WELL BEFORE USING.

DIRECTIONS FOR USE:
Application Directions: Dilute with 7 parts clean water and 1 part **Tree Saver Concentrate** (7:1 dilution). Lightly spray seedling or plants using a garden type sprayer capable of producing a fine mist. Spray only to run-off. Contents of container when diluted and sprayed in the correct manner should provide short term protection for approximately 200 plants 18 inches tall. Do not spray on fruit or vegetables intended for consumption. Do not spray during periods of known rain activity. Allow product a minimum of 24 - 48 hours to fully dry. Do not irrigate prior to this time period. Respray every 10 - 12 weeks for optimum protection. Spray new growth as needed. Apply only to dry plants. Thoroughly wet surfaces but do not apply to the point of significant spray run-off. Repeat treatments if deer damage resumes. For best results, apply to bare branches in fall, after the first frost and to unprotected new foliage in spring.

STORAGE & DISPOSAL: Keep from freezing and away from direct sunlight, stoves, hot water or heat. Do not reuse original container. Discard in trash when empty. Store at medium-low room temperature.

SAFETY INFORMATION
CAUTION: Keep out of reach of children. Wear proper safety gloves and eyewear. In case of eye contact, hold eyelids open and flush with water for 15 minutes. If swallowed, call a doctor or get medical attention. Do not spray upwind.

LIMITATIONS OF LIABILITY
REPELLEX™ makes no warranties of fitness for a particular purpose. Buyer assumes all responsibility for safety and use not in accordance with the directions.

EPA STATUS: This product has not been registered by the United States Environmental Protection Agency. **REPELLEX** represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide, and Rodenticide Act.

Repellex™ Tree Saver has been tested on many species of ornamental plants and is believed not to be generally phytotoxic. Nevertheless, it is advisable to test the product before treating the entire plant.
